

Coins

Flesch-Kincaid: 1.6 | Words: 79

What are those coins in your pocket? Coins are money. They are round and made of metal. We use coins to buy items. In the United States, we have four common coins. A penny is brown and is worth one cent. A nickel is silver and is worth five cents. The smallest silver coin is a dime. It is worth ten cents. A quarter is silver and worth twenty-five cents. How much money do you have in your pocket?
